

Business Charging

Take charge the real smart way.

There are charging stations, and then there's Smappee. Smarter. Better looking. And more cost-effective too. Smappee combines all the good things you wish for in a business charging solution. Beautiful design that you can be proud of backed by sophisticated technology and impeccable service. So that you can be sure that driver needs are always met, while you are able to use energy wiser and in the most efficient way. That is why those who want to be confident, and smartly save, choose Smappee.

Discover our smart charging solutions that perfectly fit your business.

Be smart Smappee's advanced smartness helps you save.

Always meet driver needs

Basic chargers charge each car at the same speed, but Smappee's sophisticated technology allows for setting different charging requirements for various users. This means drivers will always be charged when they need to be.

Manage your energy wisely

The Smappee Infinity energy management system that integrates with our charging infrastructure not only helps you charge smarter but also creates smart insights into the energy consumption of your building. So, you will have all you need to make wise energy choices and save.

Charge at the best price

Our smart charging system has integrated forecasting and dynamic phase switching, making it possible for you to optimally charge your electric vehicle with solar power. It also cleverly regulates charging around the time with the lowest grid tariffs. Plus, it makes it possible for you to choose your preferred capacity limit to easily side-step exorbitant (capacity) rates. This way you can save up to 50 % on charging costs.

Meet energy demand without fail

Charging a fleet of electrical cars places a huge demand on the power supply of your building. With Smappee's cascade overload protection, you don't need to worry about tripped switches, cars not charging, or having to fork out for big upgrades of your electrical infrastructure. Even if your building has multiple breakers. Our system helps everything run smoothly while you save up to 25 % of your installation budget.

Monetise your charging stations

Increase your income by opening your charging stations to the public. Simply set your pricing schedule per charger and customise discounts for various users through the Smappee Dashboard. For a reliable payment and billing partner, Smappee's range of EV charging services and AFIR compliant payment terminal (only in the Eurozone) have you covered.

Be confident **One** complete solution that smartly gives you full control over fleet charging.

Have control with one complete solution

Setting up EV charging is a lot to handle, from power capacity to installation, charger selection, management, and payments. Smappee takes care of it all with a modular, open, scalable and future-ready solution tailored to your charging needs, no matter how big your charging square.

Always future-proof and safe

Enjoy complete peace of mind with smart chargers built for open connectivity and easy integration, that withstand the test of time. Fully AFIR-compliant and V2G ready, Smappee chargers are built to evolve with tomorrow's charging standards. Through the Smappee Cloud, your data is not only safeguarded but your charging system can also continually be upgraded with new features and technologies.

Seamless payments, effortless charging

Charging with Smappee is simple and hassle-free. Just plug in to start charging, scan the QR code to pay by credit card, or use the Smappee Charge card (select regions, with a pre-paid option available), as well as the most common charging cards and RFID tokens. The Smappee Pay Station streamlines payments for an entire charging square, making it easy to manage and monetise your charging setup.

Charging for employees, also at home

Our cost-effective EV Wall and EV One chargers offer reliable essential charging, a scalable home charging solution for your employees. Make home installations effortless with our customer portal, while automated split billing takes care of invoicing and reimbursements.

Expert installation you can trust

Rely on our Smappee Certified installers for a seamless installation. Trained through the Smappee Academy and backed by Smappee's top-tier support team, they ensure your charging infrastructure is set up perfectly, every time.

Be green The right choice for humankind and the future of our planet.

Supporting your green ambitions

Doing your bit for the planet is something to feel good about. Smappee is here to help make your change-over to e-mobility and renewable energy as easy and enjoyable as possible. We make it simple, not only with our advanced cleantech which helps you charge in the most efficient way with renewable energy, but also in designing our products with a sustainability-first mindset.

Smartly sustainable by design

Crafted from durable materials and adhering to minimalist design principles, Smappee chargers use only the essentials, embodying both sustainability and design excellence. The beautifully designed chargers feature forward-thinking aesthetics and a functional LED light that provides essential feedback while doubling as ambient lighting to enhance safety in parking spaces. We continue to take steps to design our products for a greener future.

Be stylish

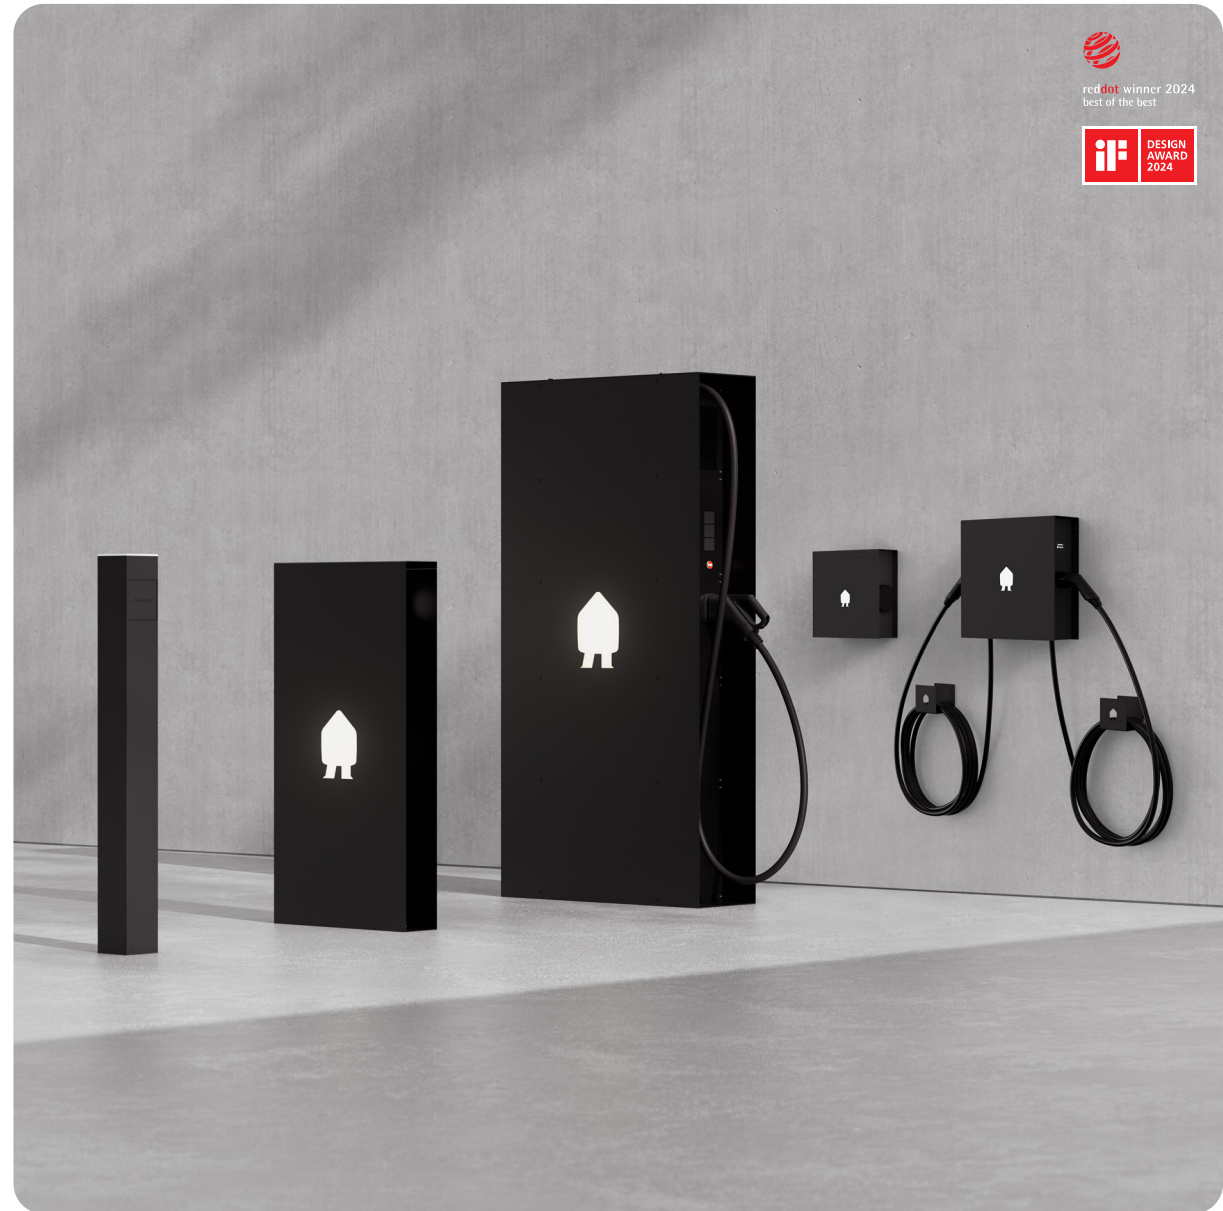

A charger to be proud of with trusted European quality.

Award-winning design

The beautiful Smappee family of EV Line chargers was specially created with design-forward thinking to best complement your business. A job we took so seriously that we racked up accolades, such as the Red Dot Design Award, iF Design Award and Henry van de Velde Awards. Whether free-standing or wall mounted, in your driveway or parking area, the seamless minimalistic design of our chargers is sure to complement any environment from traditional architecture to modern design.

European quality

Smappee is a cleantech business with advanced expertise in the development and production of high-quality energy solutions. The innovation, design and manufacturing of Smappee's EV Line of chargers fully take place in Belgium. We attach great importance to the quality of our products and services and your satisfaction as our customer is central to our business.

Smarter charging, effortless control.

Smappee's charging management platform provides complete control over every aspect of EV charging. Manage everything effortlessly, all from the comfort of your office – whether you're connecting multiple chargers to your dashboard or exporting a CSV file for expensing. On top of that, Smappee offers expert installation and maintenance services to ensure a smooth and reliable operation from day one.

Seamless charging management and expert services for total peace of mind.

ⓘ Feature details

Charging features

- Live & historical charging sessions
- Static overload protection
- Offline charging
- Charging scheduling

Optimise with renewables

- Solar live & historical insights
- Solar forecasting
- Charge with solar surplus
- Dynamic phase switch

Optimise with tariffs & rates

- Energy rates (e.g. day/night, shoulder, peak, off peak)
- Dynamic rates (not supported in all regions)
- Smart scheduling (set departure time and travel distance)

CPO by Smappee (only applicable in Eurozone)

- Session history
- Pricing policies
- Scan and charge
- Publish on third party maps via OCPI
- Broad charging network (direct OCPI + roaming hub connections)
- Payment services (invoicing, roaming, Smappee Pay Station)

Add-ons*

e-Mobility

- Smappee charge card
- eMSP activation enables EV-drivers to charge anywhere
- Budget cap / pre-paid / pre-charged
- Session history

Split billing

- Session history
- Enable employee to charge at home with automated reimbursement

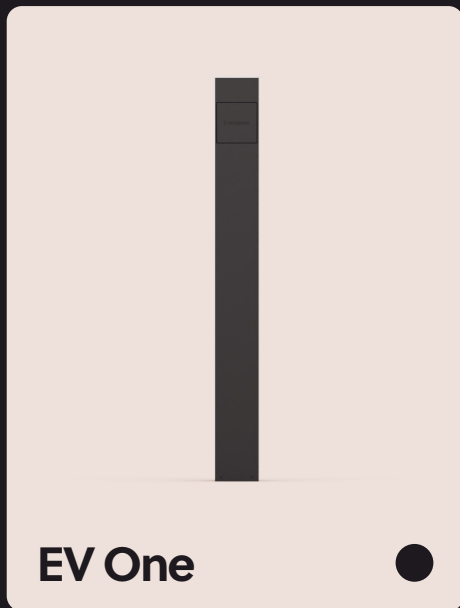

Extra services

- Custom SLA
- Extended product warranty
- Support services

*not supported in all regions.

The smartest charging solution for your business, single, dual or ultra-fast.
