

Home Charging

100% in charge.

Effortless charging that grows with you.

Smappee's award-winning EV Line gives you reliable, effortless charging that just works, every time. Tap into smart features on demand, so you can take control of your energy and save while you're at it. It's smart, flexible, and ready for the future – so you can be too.

Always ready to start your day

Our chargers are built to last, meeting all safety standards and crafted with eco-friendly, durable materials for peace of mind, day after day.

When charging becomes a simple pleasure

Thoughtfully designed, every detail is carefully considered for ease and simplicity, seamlessly fitting into your home and daily life.

Fit for all electric vehicles

Smappee chargers are perfectly compatible with all electric vehicles, adapting to the needs of your car for the most efficient and reliable charge.

Award-winning design, brilliantly simple

Smappee combines Belgian quality with advanced technology to create a charger that's as beautiful as it is simple to use.

Smart charging, exactly when you need it

With Smappee, you're always in control. Choose your charger and start charging right away with the built-in essential features. Want to unlock more smart features? Add a P1 module or Smart kit upgrade and switch to the Smart subscription whenever you're ready.

Choose how smart and efficient your charging should be.

Did you know that charging at home can double your energy bill? With Smappee, you can choose how smart your charging is. Unlock smart features and easily cut costs, optimise energy use, and stay in control – all with one easy-to-use app.

Optimised energy management, also for your home

With Smart mode, you don't only charge smarter, you also get precise smart insights into the energy use of your home. See exactly where your power goes, make smarter choices, and save. It's that easy.

Seamless energy balance

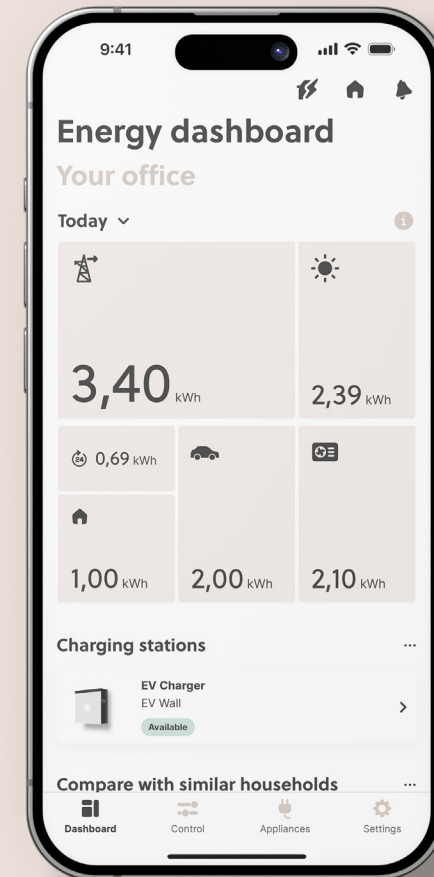

Dynamic load balancing keeps your home and charger in perfect sync. No tripped circuits, no hassle - just the right charge for your car while your home runs smoothly and life can happily go on as normal.

Always charge at the best price

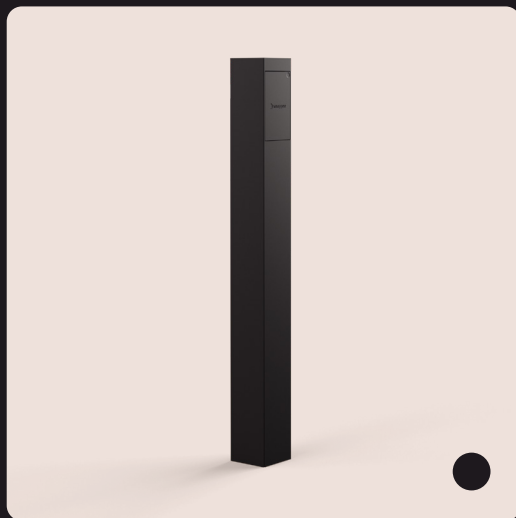

Keep your electricity bill as low as possible by charging when electricity rates are at their lowest and smoothly side-step exorbitant capacity rates by setting a maximum capacity threshold.

Use solar energy to the max

Ready for seamless solar integration? Smart mode makes it simple for you to optimally charge your EV with solar power. With built-in solar forecasting and clever phase switching not a bit of solar energy will go to waste.

The smartest charging solution.

EV One

floor mounted

up to 22 kW

1 socket

EV Wall

wall mounted

up to 22 kW

1 socket or charging cable

Additional hardware

P1 module

Plug & play dongle for digital utility meters. Enables smart energy insights, solar surplus charging, and dynamic overload protection.

4G Connect

The 4G Connect is an alternative to the Connect. Data is transferred via 4G.

Smart kit

Advanced energy monitoring for full solar integration and smart charging. Delivers high metering accuracy, live solar insights, and forecasting.
