Smart charge
your EV at home
Confident every day

Take charge in style with Smappee's smart home charging solutions, which can help you save every step of the way. Available in entree level and smart versions and compatible with all electric cars, Smappee chargers are the perfect choice for everyday charging at home. Smartly designed for inside and out, and a pleasure to control through the Smappee App, you can conveniently charge your EV while you kick back at home. Be confident that you will always be ready to start your day.

Benefits of home charging with Smappee

Do you know that charging your EV at home will double your energy bill? That is why those who want to be confident and smartly save, choose smart charging with Smappee.

1. Always charge at the best price

Our smart charging system cleverly regulates charging around the time with the lowest grid tariffs and helps you side-step exorbitant capacity rates. This way you can save up to 50%.

2. Charge with maximum solar

Connect your home charger to solar panels and maximize your savings while also being sustainable. Our built-in solar forecasting helps you optimally charge with solar power.

3. Design you can be proud of

Our award-winning design and Belgian quality are sure to complement your beautiful home. Wall-mounted or free-standing, the choice is yours.

4. Advanced energy management

Our integrated energy management system not only monitors the energy consumption of your charger but also your home, balancing usage between the two. So there will be no tripping and life can go on as normal.

5. Safe and durable

Smappee charging stations meet all safety requirements and are produced with eco-friendly, recyclable and durable materials.

6. Installed by a professional

Smappee Certified installers are backed by the highly rated Smappee support team. This makes for quick and trusted installation you can rely on.

You have the power with the Smappee App

Easy, smart, and insightful, the Smappee App places smart charging and energy management firmly in your hands. Make the most of tracking, managing, and optimizing your charging sessions and have everything at your fingertips to charge and use energy in the most cost-effective and efficient way.
