# Smappee EV Line: truly intelligent EV charging

## Optimal use of your power thanks to load balancing for AC and DC charging

The Smappee EV Line offers unique smart charging solutions for both homes and businesses and AC and DC charging. Thanks to Smappee's integrated smart energy management technology, EV Line charging stations are equipped with dynamic load balancing and overload protection.

## Up to 6x cheaper by charging with solar or off-peak power.

Smappee offers a simple way to maximise the use of renewable energy throughout the day for each charging session. In this way, you optimise your self-sufficiency and save costs. When solar is not available, Smappee considers off-peak energy or dynamic and capacity rates to charge the cars with the cheapest energy and keep your load peaks under control.

## Scalable and future-proof

Smappee EV Line charging stations are compatible with Smappee Infinity. This way you can optimise your energy consumption and your charging square will be in perfect harmony with your other energy flows. Want more charging stations or more control over time? No problem. Build on your existing installation via the modular Smappee ecosystem. Thanks to the over-the-air updates you will never have to worry about outdated technology.

# Powerful EV charging management platform

When you buy a Smappee smart charging solution, you also get immediate access to our complete charging management platform. It takes care of all aspects related to electric charging. The Smappee Dashboard offers numerous features that help manage and operate your charging stations or charging square.

## Manage each charging point remotely

As soon as you place multiple charging points on your premises where different users come to charge, you need more control. The Smappee smart charging platform offers that control... and more. Use the Smappee Dashboard to add priority charging, set tariffs, close your charging stations outside office hours, etc. In addition, you can track the status of all your charging points in real-time and quickly solve problems remotely.

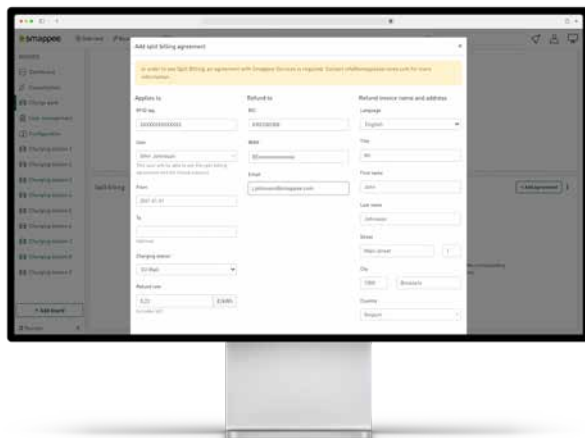

## Priorities and whitelisting

Easily manage charging revenues by applying different charging rates and priorities down to user level. Via the Smappee Dashboard you can allocate priorities to the Smappee Smart Charge Cards. That way, your sales team or visitor is on the road again fully charged in no time. Or whitelist the Smappee RFID cards for your employees and visitors to charge for free or at a reduced rate on your charging square.

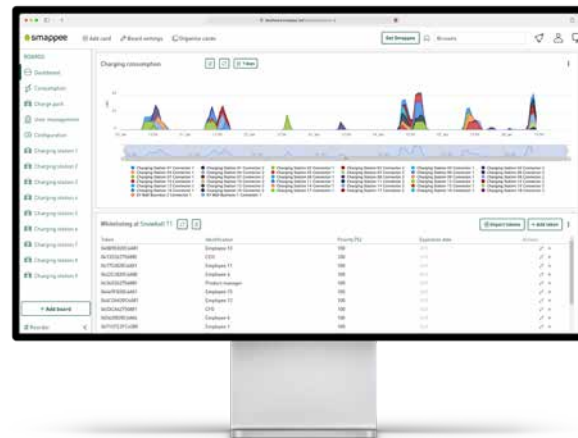

## Charging costs and split billing

Get an extensive overview of charging sessions, costs, and revenues per charging point via the Smappee Dashboard. Manage every charging point, on premise or remotely at your employee's house, and easily offer split billing based on the data in the dashboard. That way, you can reimburse your employees for the charges at home or bill them correctly for the charging sessions at your charging square.

## Smappee CPO services

Choose Smappee for a simple and easy all-in-one payment solution. The Smappee CPO services take care of the payment and invoicing of the charges at your charging stations. EV drivers can charge using their charge cards. Smappee will then reimburse you for the charges periodically.

# Smappee EV One <sup>HOME</sup>

- Integrated local autonomous overload protection and solar optimisation.
- Insights and control over charging process and costs.
- Real-time and historical energy data - grid, solar, always-on.
- Control charging sessions with QR code, RFID and smart schedules.
- Easily expandable with Smappee Infinity for more home energy management.
- Secure OCPP and OCPP roaming.

The Smappee EV One Home is a floor-mounted smart EV charging station with one connector, for standalone use at home. Thanks to the integrated Smappee Infinity technology it ensures autonomous overload protection and optimised self-consumption. Receive detailed insights on your energy usage and production, the charging process and costs via the App and Dashboard. The EV One Home is easy to install with simple cable configuration and installation wizard. The integrated LED lighting indicates charging status. Charging sessions can be started and stopped via QR code, RFID and smart EV schedules.

## Dimensions:

1100 × 120 × 120 mm

## Weight:

- EV One with 1 socket: 11 kg
- Mounting anchor: 1.5 kg

## Operating temperature:

-25 °C to 40 °C

## Storage temperature:

-25 °C to 60 °C

## Relative humidity:

0 % - 95 %, non-condensing

## Operating altitude:

0 - 2,000 m

## Standards:

IEC 61851-1

## Product certifications:

CE

## Connectivity:

- Wi-Fi 2.4 GHz
- Ethernet 100BASE-T

## Communication protocol:

OCPP 1.6 J, ready for update to OCPP 2.0.1

## Mounting method:

Floor

## Enclosure:

- Material: Magnelis (structure), aluminium (housing)
- Rating: IP54 / IK10
- Standard colour: RAL7021 (black grey)

## Integrated Residual Current Protection:

6 mA DC / 30 mA RCD type A

## Required external protection:

Breaker of max. 40 A, type B or C

## Integrated Energy Management:

Grid & solar measurements

## Charging:

- Maximum charging capacity: 22 kW
- Output power: 3 phase, 230 V/400 V, 32 A
- Charge mode: Mode 3 (IEC 61851)
- Charging activation: QR code / Plug and charge / RFID
- Information status: RGB LED
- kWh meter compliant with IEC 62053-21

## Connectors:

1 × type 2 socket

# Smappee EV One <sup>BUSINESS</sup>

- Solar optimisation and autonomous overload protection.
- Real-time and historical charging costs.
- Control charging sessions with QR code, RFID or smart schedules.
- Integrated MID-meter for MID-graded invoicing.
- Works stand-alone or combined with Smappee Infinity for smart features.
- Secure OCPP and OCPP roaming.

The Smappee EV One Business is a floor-mounted smart EV charging station with one connector, designed for use in a business environment. When combined with Smappee Infinity it ensures autonomous overload protection and optimised selfconsumption. Detailed insights on your charging process and costs can be received via the App and Dashboard. The EV One Business is easy to install with simple cable configuration and an installation wizard. The integrated LED lighting indicates charging status. Multiple payment options are available via QR code or RFID.

**Dimensions:**

1100 × 120 × 120 mm

**Weight:**

- EV One with 1 socket: 11.4 kg
- Mounting anchor: 1.5 kg

**Operating temperature:**

-25 °C to 40 °C

**Storage temperature:**

-25 °C to 60 °C

**Relative humidity:**

0 % - 95 %, non-condensing

**Operating altitude:**

0 - 2,000 m

**Standards:**

IEC 61851-1

**Product certifications:**

CE

**Connectivity:**

Ethernet 100BASE-T

**Communication protocol:**

# Smappee EV Wall <sup>LITE</sup>

- Real-time and historical charging costs.
- Manually set up overload protection with fixed maximum current.
- Control charging sessions with QR code, RFID.
- Easy and simple to install.
- Secure OCPP and OCPP roaming.

The Smappee EV Wall Lite is a wall-mounted EV charging station with socket for standalone use at home. It provides overload protection by manually setting a fixed maximum current. The EV Wall Lite is easy to install with simple cable configuration and installation wizard. The integrated LED lighting indicates charging status. Charging sessions can be started and stopped via QR code, RFID. Receive detailed insights on your charging process and costs via the Smappee App.

## Dimensions:

300 × 300 × 110 mm (station)

## Weight:

4,4 kg

## Operating temperature:

-25 °C to 40 °C

## Storage temperature:

-25 °C to 60 °C

## Relative humidity:

# Smappee EV Base

- Solar optimisation and autonomous overload protection.
- Real-time and historical charging costs.
- Priority charging, multiple rates and easy payment options with QR code or RFID.
- Works stand-alone or combined with Smappee Infinity for smart features.

The Smappee EV Base is a floor-mounted smart EV charging station with two connectors. When combined with Smappee Infinity, it offers smart charging, ensuring optimised self-consumption and autonomous overload protection. Users and operators receive detailed insights in the charging process and costs via the App and Dashboard. The EV Base is easy to install with simple cable configuration and installation wizard. The integrated LED lighting indicates charging status and ensures sufficient visibility in the parking area. It comes with fixed cables or sockets and offers multiple payment options via QR codes or RFID.

## Dimensions:

- 1200 × 600 × 150 mm (station)
- Charging cable 5 m

## Weight:

- EV Base station: 34 kg
- Cable 5 m: 3 kg

## Operating temperature:

- 25 °C to 40 °C

## Storage temperature:

- 25 °C to 60 °C

## Relative humidity:

- 0 % - 95 %, non-condensing

## Operating altitude:

- 0 - 2,000 m

## Standards:

- IEC 61851-1

## Product certifications:

## Enclosure:

- Material: Magnelis (back plate), aluminium (front and sides)
- Rating: IP54 / IK10
- Standard: RAL9016 (star white)  
+ RAL7021 (black grey)

## Integrated Residual Current Protection:

- Per connector:

- 6 mA DC / 30 mA RCD Type A

## Required external protection:

- Per connector:

- Breaker of max. 40 A, type B or C

## Charging:

- Maximum charging capacity:  
22 kW per connector
- Output power: 230 V/400 V, 32 A
- Charge mode: Mode 3 (IEC 61851)
- Charging activation: QR code /  
Plug and charge / RFID
- Information status: RGB LED
- MID metering, certified class B

## Connectors:

- 2 × fixed cable with type 2 connector
- 2 x type 2 socket - optional shutter

# Smappee EV Base<sup>BLACK</sup>

3 phase with two sockets in RAL 7021 (black grey).

- Solar optimisation and autonomous overload protection.
- Real-time and historical charging costs.
- Priority charging, multiple rates and easy payment options with QR code or RFID.
- Works stand-alone or combined with Smappee Infinity for smart features.

The Smappee EV Base is a floor-mounted smart EV charging station with two connectors. # Smappee EV Ultra

- Fast DC charging for CCS2 vehicles.
- Dynamic and cluster load balancing of Smappee EV Line.
- Priority charging, multiple rates and easy payment options with QR code, RFID or a payment terminal.
- Elegant and compact design with LED lighting for increased visibility and security.
- Easy smart charging management with one single platform.

The Smappee EV Ultra is a floor-mounted fast charger with one or two CCS2 connectors. When combined with Smappee Infinity it ensures autonomous overload protection. Smappee's smart charging platform offers users and operators detailed data on the charging process and costs and allows for remote control over multiple charging points. Payments are made via QR code or RFID token and a payment terminal can be added. Charging status and how to charge is visible on the display. The EV Ultra has a robust and compact all weather enclosure made of high-quality materials. It's modular set-up and over-the-air updates make the EV Ultra durable and future-proof.

## Charging cable:

- Length: 3,25 m
- Weight: 9,5 kg

## Operating temperature:

- 25 °C to 50 °C (derating from 40 °C)

## Storage temperature:

- 25 °C to 70 °C

## Relative humidity:

- 0 % to 95 %, non-condensing

## Operating altitude:

- 0 to 2,000 m

## Standards:

- IEC 61851-21, ISO 15118, DIN SPEC 70121

## Product certifications:

- CE, Eichrecht compliant

## Connectivity:

- Ethernet 100BASE-T (with fallback to 4G in case of connection loss)
- 4G Modem

## Communication protocol:

- OCPP 1.6 J, ready for update to OCPP 2.0.1

## Interfaces:

- Information status: 6.5" RGB Display
- Session activation: QR code / RFID (Optional payment terminal)

## Mounting method:

- Floor, with supplied anchor

## Enclosure:

- Material: Powder coated steel
- Standard colour: RAL7021 (black grey) optional customization.
- Rating: IP 54 / IK 10
- Acoustic noise: 0 dB - 60 dB
- Indoor / outdoor use

## Nominal input:

- Main power supply: 3P + PE
- Auxiliary power supply: 5G2.5 mm<sup>2</sup>
- Rated voltage (Un): 400 Vac ± 10 %
- Rated frequency (fn): 50 Hz
- Nominal input current: 120 - 700 A
- Power factor: > 98 % at full capacity
- Efficiency: 95 % at full capacity

## DC Output:

- Charge mode: Mode 4 (IEC 61851)
- DC Plug: CCS2
- Connection case: Case C (fixed cable)
- Maximum current: 500 A (boost mode)

# Smappee EV Ultra versions

## ULTRA 480D

- 2 x 240 kW
- 1870 x 920 x 650 mm
- 660 kg
- 2 cables
- 2 dynamic displays
- Input current: 700 A

## ULTRA 240S

- 240 kW
- 1870 x 920 x 325 mm
- 240 kg
- 1 cable
- 1 dynamic display
- Input current: 350 A

## ULTRA 240D

- 2 x 120 kW
- 1870 x 920 x 325 mm
- 240 kg
- 2 cables
- 2 dynamic displays
- Input current: 350 A

## ULTRA 80D

- 2 x 40 kW
- 1870 x 920 x 325 mm
- 240 kg
- 2 cables
- 2 dynamic displays
- Upgradable to 240D
- Input current: 120 A
