To create a world where everyone relies exclusively on renewable, locally generated, and affordable energy, ensuring sustainable living for future generations.

2. Purpose and Background

This document details our commitment to the UN Global Compact.

As part of our commitment to sustainable and responsible business practices, Smappee has joined the United Nations Global Compact initiative – a voluntary leadership platform for the development, implementation and disclosure of responsible business practices.

As a special initiative of the UN Secretary-General, the United Nations Global Compact is a call to companies everywhere to align their operations and strategies with ten universally accepted principles in the areas of human rights, labour, environment and anti- corruption, and to take action in support of UN goals and issues embodied in the Sustainable Development Goals. Its ambition is to accelerate and scale the global collective impact of business of business by upholding the Ten Principles and delivering the Sustainable Development Goals through accountable companies and ecosystems that enable change.

Launched in 2000, the UN Global Compact is the largest corporate sustainability initiative in the world, with more than 15,000 companies and 3,800 non-business signatories based in over 160 countries and more than 69 Local Networks.

Smappee commits to make the UN Global Compact and its principles an integral part of our business strategy, day-to-day operations and organisational culture. In doing so, Smappee joins thousands of other companies globally committed to taking responsible business action to create the world we all want.
