

# Smappee Power Box

The Power Box is the compact and robust heart of the Smappee Infinity monitoring system. It's compatible with almost any electricity network worldwide and is DIN-rail mountable. It measures the line voltage of the connected phases, collects the currents from the CT sensors and calculates power, active energy, reactive energy and other energy and power quality data. It also provides power to all components.

- Works with almost any electricity network worldwide.
- Energy metering functionalities.
- You can use up to 28 CTs.
- Provides power to the entire system.
